

## Ideation Phase

### Brainstorm & Idea Prioritization Template

|               |                                                         |
|---------------|---------------------------------------------------------|
| Date          | 30 September 2026                                       |
| Team ID       | SWTID-2026-1429                                         |
| Project Name  | ComicCraft - AI Comic Story Creator using Gemini Models |
| Maximum Marks | 4 Marks                                                 |

#### Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

#### Step-1: Team Gathering, Collaboration and Select the Problem Statement

### Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare  
🕒 1 hour to collaborate  
👤 2-8 people recommended

➔

**Before you collaborate**

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

---

**A Team gathering**  
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

**B Set the goal**  
Think about the problem you'll be focusing on solving in the brainstorming session.

**C Learn how to use the facilitation tools**  
Use the Facilitation Superpowers to run a happy and productive session.

1

**Define your problem statement**

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

---

PROBLEM

How might we [your problem statement]?

**Key rules of brainstorming**

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

#### Team gathering and collaboration:

Team members: SANJAYKAVIN S, MOHAMED BOWMIN R, SAKTHIVEL S, SONIYA N.

Problem statement selected: Non-artists and casual storytellers find it difficult, slow and costly to turn story ideas into illustrated comics, and existing tools offer limited personalisation. ComicCraft uses Gemini models and Stable Diffusion to generate a personalised, panel-by-panel comic with illustrations that can be previewed and downloaded as a PDF.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mind.

Ideas listed and grouped by theme:

| Group             | Ideas                                                                                                                                                                                     |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Story generation  | Panel-by-panel comic outline from a prompt<br><br>Narration and character dialogue<br><br>Tone selection (dramatic, funny, poetic, light-hearted)<br><br>Personalised main character name |
| Visual generation | Comic-style illustrations for every panel<br><br>Multiple art styles (anime, comic book, pixel art, realistic)<br><br>Consistent look across panels                                       |
| Output & export   | On-screen comic preview<br><br>Download as PDF with images and narration<br><br>Export success page                                                                                       |

|                     |                                                                                                                                         |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Usability & API     | Simple web form built with HTML, CSS and Jinja2<br><br>JSON API endpoint for developers<br><br>Image test route                         |
| Future enhancements | User accounts and comic library<br><br>Multi-page story arcs<br><br>Speech bubbles and voice narration<br><br>Regenerate a single panel |

### Step-3: Idea Prioritization

4

#### Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

### Idea prioritization (based on impact vs. effort):

| Idea                                                          | Impact | Effort | Priority  |
|---------------------------------------------------------------|--------|--------|-----------|
| User input form (prompt, character, setting, tone, art style) | High   | Low    | Must have |
| 5-panel outline generation (Gemini Flash)                     | High   | Low    | Must have |
| Narration & dialogue generation (Gemini Pro)                  | High   | Medium | Must have |
| Panel illustrations (Stable Diffusion)                        | High   | High   | Must have |

|                                                        |        |        |              |
|--------------------------------------------------------|--------|--------|--------------|
| Comic preview page + PDF export (FPDF)                 | High   | Medium | Must have    |
| Regenerate with different tone / art style             | Medium | Low    | Should have  |
| JSON API endpoint & test-image route                   | Medium | Low    | Should have  |
| User accounts & comic library                          | Medium | High   | Future scope |
| Multi-page story arcs, speech bubbles, voice narration | Low    | High   | Future scope |

Selected for implementation: input form, outline + story generation, panel illustrations, preview and PDF export, with tone / art-style customisation.
