

Ideation Phase

Empathize & Discover

Date	30 September 2026
Team ID	SWTID-2026-1429
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example: Food Ordering & Delivery Application

Empathy Map for ComicCraft - AI Comic Story Creator:

User persona: An aspiring storyteller / student / hobbyist who has creative story ideas but lacks drawing skills, design tools or time to build a comic manually.

SAYS	THINKS
"I have a great story idea but I can't draw." "I want my comic to look like anime / comic-book style." "Can I change the tone and make it funnier?" "I want to download and share it as a PDF."	"Will AI understand my story and characters?" "Will the images match the mood I want?" "I wish making a comic didn't take days." "Can someone without art skills do this?"
DOES	FEELS
Writes story prompts and notes character names, settings and tones. Searches for comic makers and design tools online. Tries different tones and art styles to match the vision. Reviews the preview and downloads the comic as a PDF.	Excited about turning ideas into visuals. Frustrated by lack of art skills and time. Anxious about quality and consistency of AI output. Proud and satisfied when the comic matches the vision.

PAINS	GAINS
Needs artistic skill and expensive software. Writing narration and dialogue manually is slow. Generic tools offer fixed templates and little personalisation. Hard to keep story and visuals cohesive.	A complete comic generated from a single prompt. Personalised characters, setting, tone and art style. Panel-by-panel story with narration and dialogue. Easy preview and professional PDF export to save, print or share.
